5 (Integrated Finishing Services (Interior & Exterior Paints

We provide comprehensive, high-quality finishing and painting solutions for residential, commercial, and industrial projects. Our approach blends advanced aesthetics with high-performance materials to deliver durable, visually appealing results that reflect the client's vision and protect the building for years to come.

Our Main Service Areas

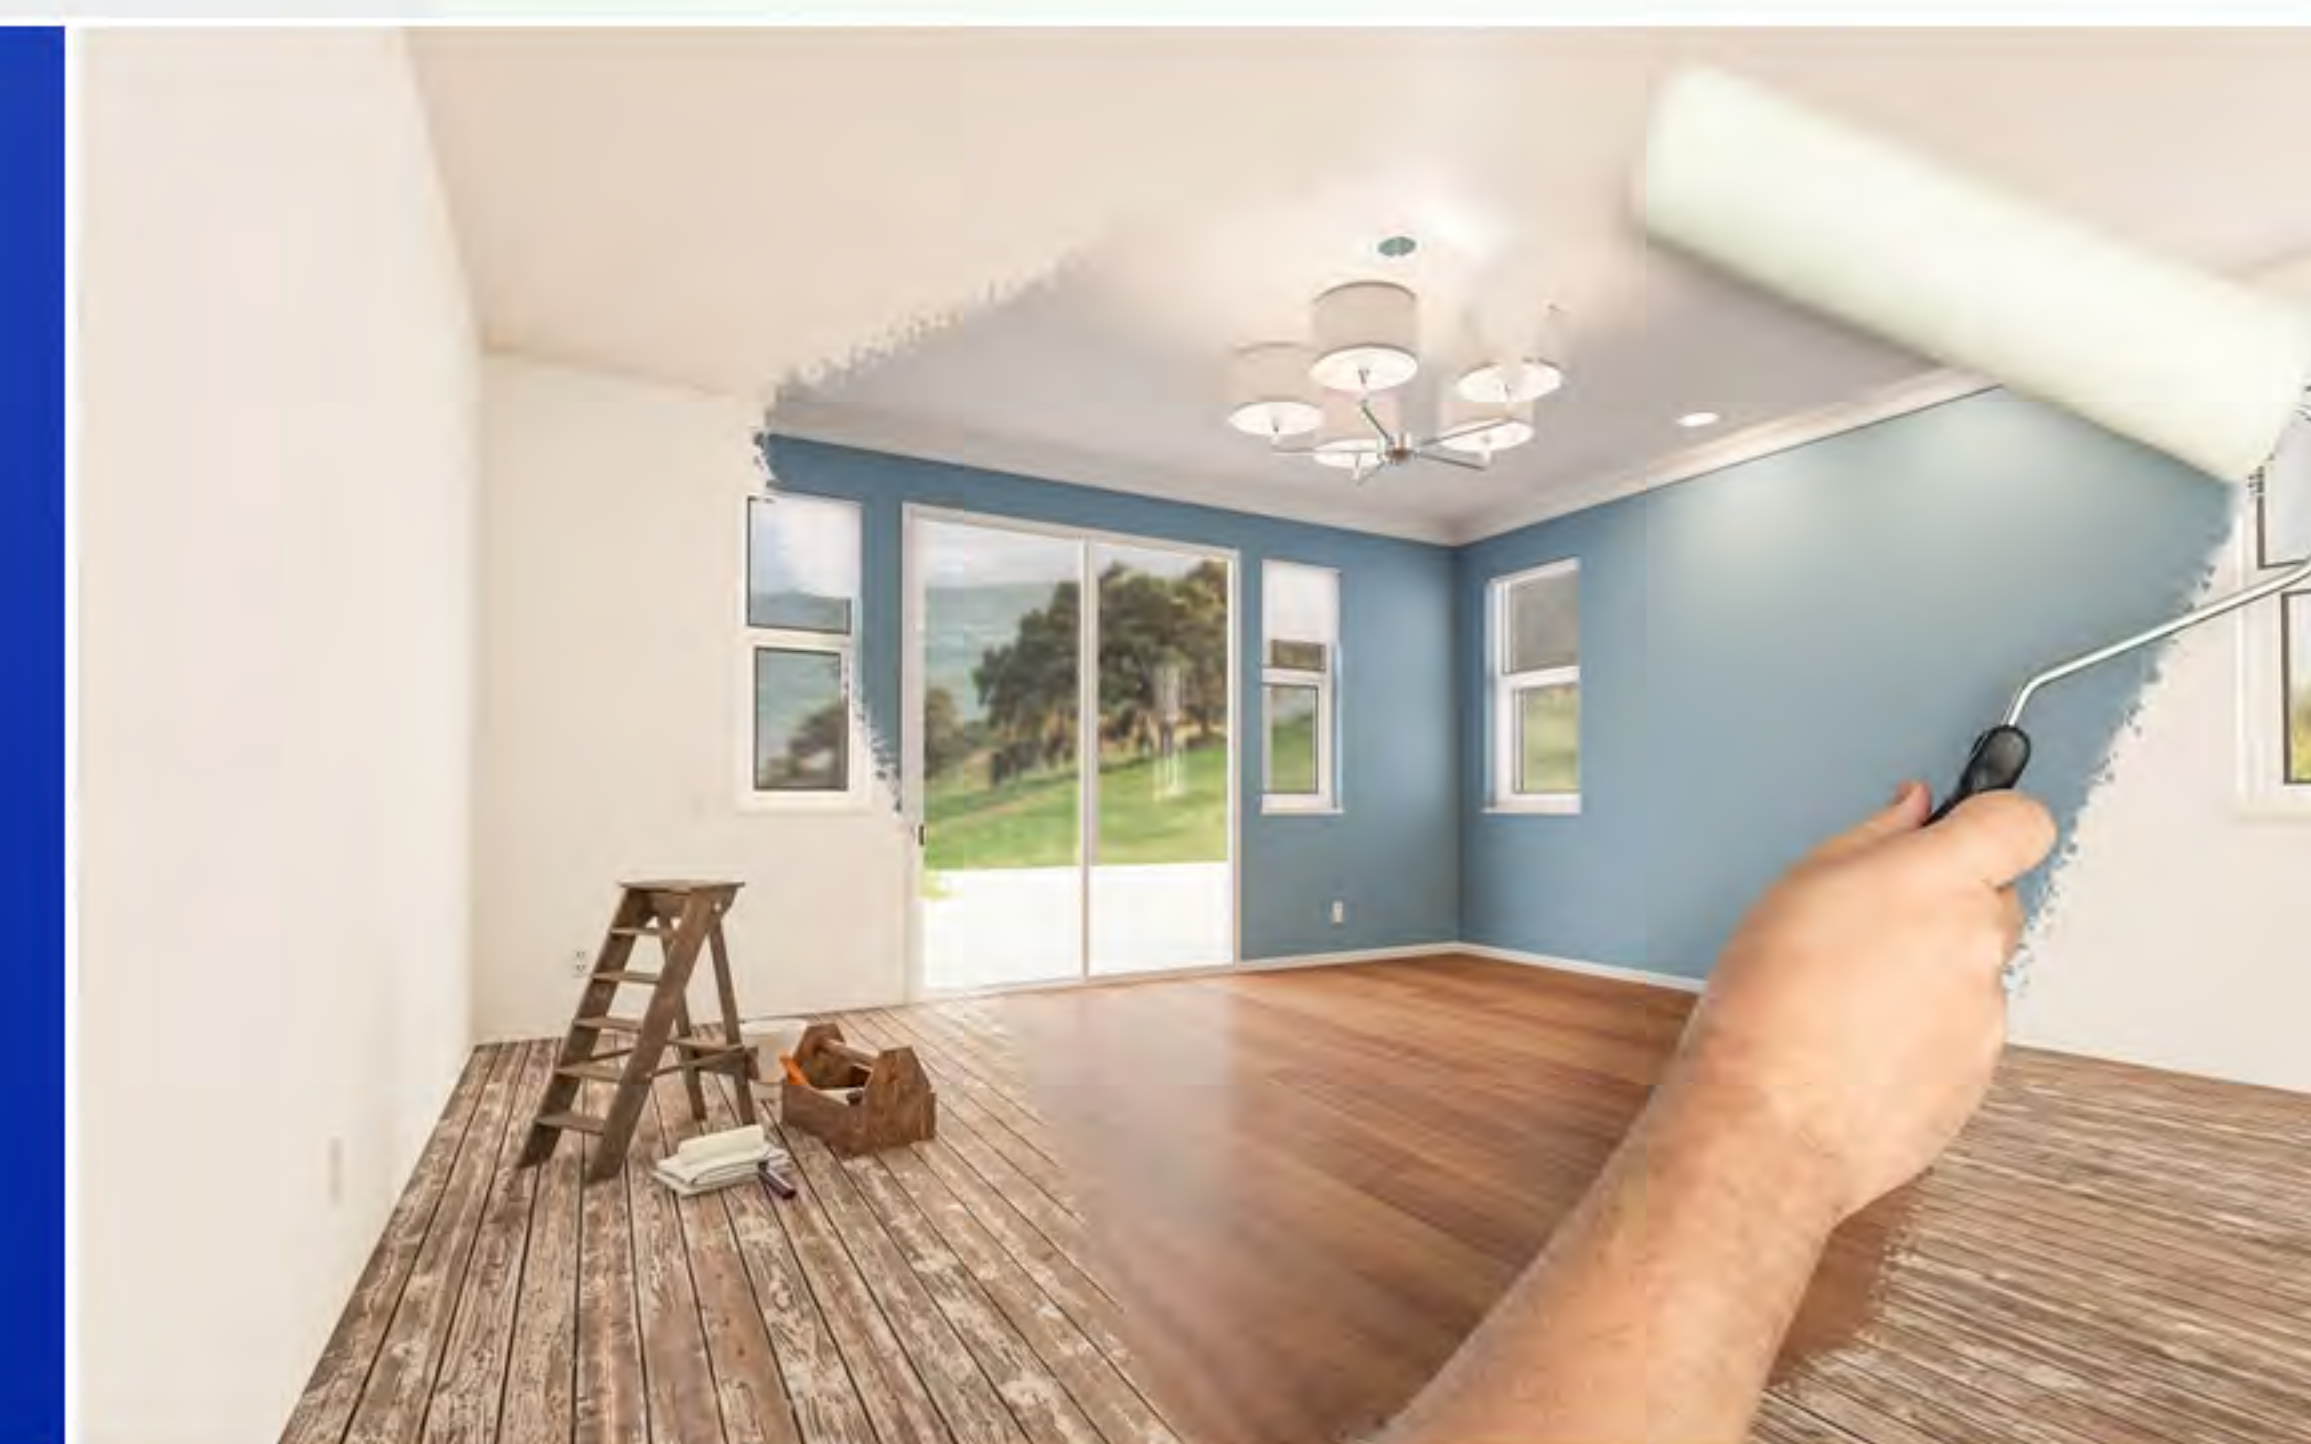

Exterior Paints

We offer high-performance façade protection systems using acrylic, silicone, and polyurethane coatings applied in multi-layer systems that include crack treatment, insulating primers, and final coats resistant to mold and dust. Our exterior finishes ensure superior weather resistance, long-term color stability, and breathable coatings that prevent trapped moisture.

Interior Paints

We deliver aesthetic and hygienic interior paint solutions using vinyl, acrylic, anti-microbial coatings, and special decorative finishes. Our low/zero-VOC products ensure a healthy indoor environment, with smooth, easy-to-clean finishes that maintain long-lasting color stability.

follow Our Main Service Areas

Wood & Metal Finishes

We apply professional finishing systems for wood including varnish, lacquer, and water- or solvent-based enamel after proper surface preparation and defect treatment.

For metal, we follow a complete protection methodology: rust removal, anti-corrosive priming, and durable topcoats (enamel or polyurethane), with the option to add decorative effects such as hammered or metallic finishes.

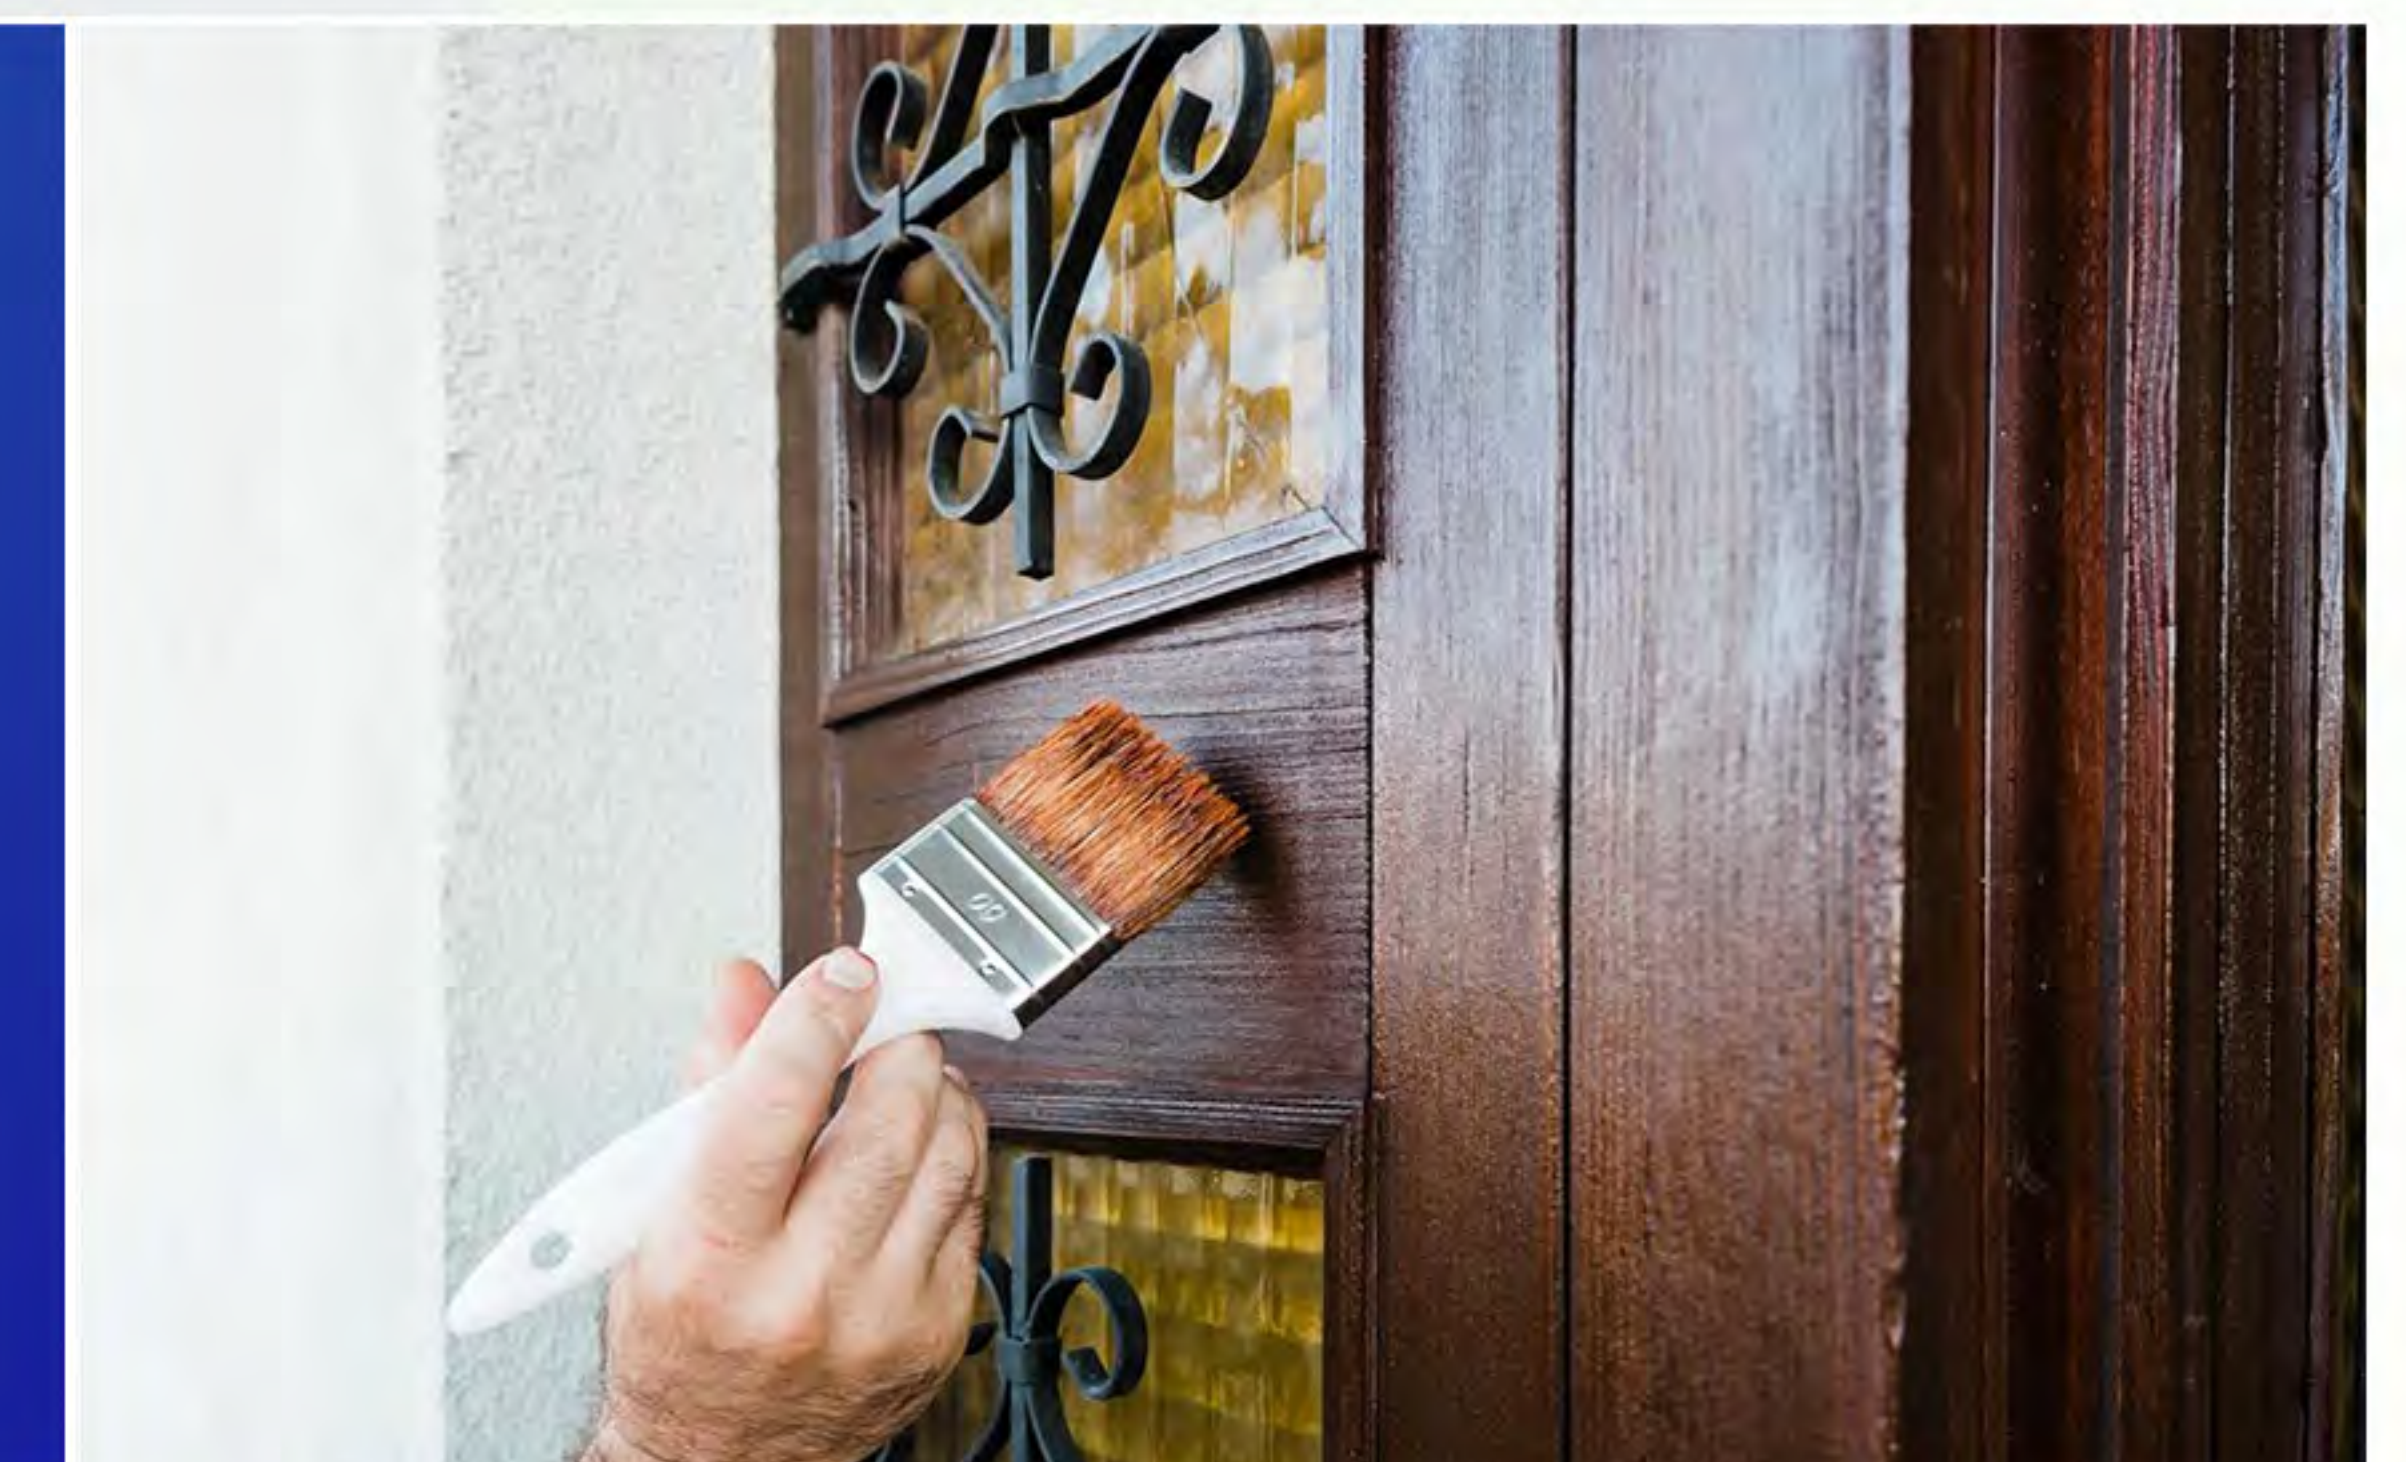

Insulating & Protective Coatings

We provide specialized coatings including thermal insulation paints, waterproof coatings for walls and wet areas, and vapor-barrier layers for high-humidity environments enhancing both building protection and energy efficiency.

Doors Finishing

We provide professional finishing services for wooden doors, including preparation, smoothing, polishing, and final coating. For steel doors, we apply a complete corrosion-protection system starting with rust removal, followed by anti-corrosive priming, and finishing with durable topcoats, with the option of adding special decorative effects.

Work Methodology & Quality Assurance

We adopt a precise execution methodology to ensure the highest quality from assessment to final handover:

1 Consultation & Planning

Analyzing the space, usage, and environment to select the most suitable coating systems and colors.

3 Material Selection

Using reputable international products that deliver superior performance and extended service life.

5 Final Inspection & Handover

Reviewing surface quality and ensuring complete uniformity before project delivery.

2 Surface Preparation (The Most Critical Step)

Performing cleaning, patching, and sanding to the highest standards to ensure long-lasting finishes.

4 Professional Application

Applying coatings through trained teams using specialized tools to achieve seamless, defect-free results

We view finishing works as the final touch that defines the building's quality and identity and we strive to transform your vision into a tangible outcome that inspires trust and satisfaction.
